

Initially, when we open the app, we see the text “2 \* 2” and a speaker button beside it. Below it, we can see the text “Click the mic to answer” and a mic to say the answer. And at last, we can see a line of your answer where our answer will display.

- Now we press the speaker it says 2 \* 2 and displays a toast message.
- When we press the mic, it asks for the user input.
- If the user says 4 it says correct otherwise it says incorrect. Also, it displays the user input in the place of “Your Answer”.
